

# Human Reproductive Body Parts

Many parts of the human body have important jobs to do. Eyes are for seeing, ears are for hearing and tongues are for tasting. Some body parts are for reproducing (making babies). All plants and animals reproduce so the species doesn't die out. Can you name these body parts and explain what they do?

## Useful Vocabulary

female  
male  
testicles  
womb  
egg  
sperm  
foetus
